SUMMARY

Full-Stack Developer, AI Engineer, and Startup Founder with experience building scalable web platforms, agentic AI systems, and hackathon management solutions used by 4000+ users. Skilled in Next.js, Django, Firebase, Python, and AI integrations. Led national-level hackathons, IEEE initiatives, and startup product development from concept to deployment.

EDUCATION

Karpagam Academy of Higher Education

B.E. in Computer Science and Engineering (CSE)

Coimbatore, India

Sep 2023 – Present

Thamarai Matric Higher Secondary School

Higher Secondary Education (11th & 12th Standard – Computer Science with Mathematics)

Thamaraipalayam, India

June 2021 – April 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, C++

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Django, Node.js, REST APIs

Databases: Firebase, MongoDB, PostgreSQL, MySQL

AI & ML: TensorFlow, OpenCV, NumPy, Pandas, RAG (Retrieval-Augmented Generation), Agentic AI

Cloud & DevOps: AWS, GitHub Actions, Docker

Tools: Git, GitHub, Figma, n8n, VS Code

EXPERIENCE

Frontend and AI Developer Intern – Xarlex

Coimbatore, India

March 2025 – July 2025

Coimbatore, India

- Built responsive, production-ready web applications using React.js and Next.js.
- Integrated AI models into live systems, improving automation and user experience.
- Gained hands-on experience in cloud deployment and collaborative engineering workflows.

Software Development Intern – Karupa Foundation

Karupa Foundation Education and Research Centre

Sep 2025 – Oct 2025

Coimbatore, India

- Designed and deployed full-stack web application modules for a DSIR-recognized organization.
- Contributed to research-oriented digital platform development and deployment workflows.
- Improved digital outreach through optimized UI/UX architecture and responsive design.

ENTREPRENEURSHIP

Founder & CEO – VYGRON Technologies

AI Development, Automation & Software Solutions Company

June 2025 – Present

Tamil Nadu, India

- Founded VYGRON Technologies, delivering AI-powered solutions, business automation, custom software, and web applications for startups and organizations.
- Led end-to-end project execution including solution design, client consultation, technical development, and deployment.
- Built intelligent automation systems and AI-driven workflows to streamline business operations and improve efficiency.

PROJECTS

Personal Portfolio Website <i>balasurya.me</i> <i>Full-Stack Web Application</i> <i>Next.js, Tailwind CSS</i> • Designed and developed a personal portfolio website showcasing projects, skills, experience, and achievements. • Built with Next.js and Tailwind CSS featuring responsive design, smooth animations, and optimized performance. • Deployed with custom domain and SEO optimization for professional online presence.	2025
HackSprint – National Level Hackathon Platform <i>Full-Stack Event Platform</i> <i>Next.js, Firebase, Tailwind CSS</i> • Built and deployed official platform that handled 4000+ participant registrations with zero downtime. • Integrated event registration, sponsor modules, real-time announcements, and admin dashboards. • Designed scalable backend architecture on Firebase to support high-concurrency traffic.	2025
Hacklyn – Hackathon Management System <i>GitHub</i> <i>Full-Stack SaaS Platform</i> <i>Next.js, Django, PostgreSQL</i> • Developed end-to-end SaaS platform managing complete hackathon lifecycle for organizers and participants. • Implemented team registration, submission portal, evaluation dashboard, and result processing. • Enabled real-time administrative monitoring with automated scoring pipelines.	2025
OLabs – Virtual Laboratory Platform <i>GitHub</i> <i>EdTech Platform</i> <i>Next.js, Django, PostgreSQL</i> • Developed virtual laboratory platform supporting 20+ experiment simulations with automated result tracking. • Integrated theory modules, guided procedures, and performance analytics for students. • Enhanced practical learning experience for 100+ students through interactive digital experiments.	2025
Face Liveness Detection for Aadhaar Authentication <i>GitHub</i> <i>Computer Vision & Security Project</i> <i>React.js, Python, Face API</i> • Built real-time facial authentication system with anti-spoofing detection for secure identity verification. • Implemented liveness detection using Face API to prevent photo and video replay attacks. • Delivered as a Chrome extension enabling seamless and secure Aadhaar-based login.	07/2025 – 08/2025
Karupa Foundation Website <i>Full-Stack Web Application</i> <i>Next.js, Django, PostgreSQL</i> • Designed and deployed official website for a DSIR-recognized education and research organization. • Built responsive modules for education programs, research initiatives, and public outreach. • Improved digital visibility and stakeholder engagement through optimized UI/UX design.	09/2025 – 10/2025

ACHIEVEMENTS

3rd Place – HackSparo Hackathon <i>AI Innovation Competition</i> • Developed AI-powered Automatic Reels Creation System among 100+ competing teams. • Automated script generation, media alignment, and video output pipeline using AI agents.	2025
Top 5 Finalist – VOID Hackathon <i>National-Level Hackathon</i> • Built Multi-Agentic Answer Sheet Evaluation System at national level among competing teams. • Designed AI-driven grading architecture for fully automated assessment and feedback generation.	2025

RESEARCH

A Human-Centric Voice Execution System for Enterprise Workflow Automation
Paper Presenter – NCTIACS-26 National Conference

Feb 2026
Karpagam Academy of Higher Education

- Presented research at the 5th National Conference on Technical Innovation and Advancement in Computational Science.
- Proposed a voice-driven AI architecture for automating enterprise workflows with human-centric design principles.
- Demonstrated integration of natural language processing and automation pipelines for real-world enterprise systems.

LEADERSHIP / EXTRACURRICULAR

Vice Chairperson – IEEE Student Branch
Karpagam Academy of Higher Education

April 2025 – Present
Coimbatore, India

- Organized 10+ technical workshops, hackathons, and seminars, growing branch participation significantly.
- Expanded IEEE membership by actively recruiting and onboarding new student members.
- Mentored 50+ students in research, project development, and national-level competition preparation.

Lead Organizer & Sponsorship Head – HackSprint 2.0
National-Level 36-Hour Hackathon

Jan 2026
Karpagam Academy of Higher Education

- Led end-to-end planning and execution of national-level 36-hour hackathon with 4000+ registrations.
- Secured industry sponsorships and managed partnerships with multiple tech organizations.
- Coordinated judges, mentors, and a cross-functional organizing team of 30+ volunteers.

Lead – Metaverse Students Association
Karpagam Academy of Higher Education

Dec 2024 – Present
Coimbatore, India

- Led 15+ student projects spanning AI, Full-Stack Development, AR/VR, and Cybersecurity domains.
- Developed 3D animated community website using modern web technologies.
- Mentored students for national-level hackathons, producing multiple finalist teams.
